## POST GRADUATE DIPLOMA IN FOOD AND PHARMA ANALYSIS AND QUALITY ASSURANCE

Food and Medicines are indispensable part of our life and safety of food and Medicines is the grave concern for us. Food and Pharma products quality has been an area for priority for consumers, retailers, manufacturers and regulators. Food and Pharmaceutical Safety Regulations in India has reached global standards with the introduction of Food Safety and Standards Act 2006 in the year 2011. With this, requirement of adequately trained manpower to be a part of Food and Pharmaceutical Safety Quality Assurance and Regulatory Systems has increased immensely. With the enormous expansion of food sector (Manufacturing, retail distribution and hospitality sector) and customer awareness, safety and quality assurance has become a very vital hitch to be addressed in the current decade. This has opened an enormous job opportunities for adequately trained human resource in the area.

In view of this, for the first time in India, Post Graduate Diploma course (One year – Full time) on Food and Pharmaceutical Safety and Quality Assurance in Food and Pharmaceutical Industry will be offered by The CVM University. The post P.G Diploma programme is intended to prepare food and Pharmaceutical scientists, food engineers, microbiologists and others with appropriate scientific backgrounds for active job opportunities in food safety and quality assurance, monitoring and certification process in the food industry and in the Government.

The course provides an outline of State-Of-Art theoretical information and practical experience, directly and indirectly related to a better understanding of food and pharma safety problems, their origin and solutions. The programme is designed to develop a practical hands on training food and pharma safety and quality.
